

Assignment -1

Assignment Date	26 September 2022
Student Name	G.Abirami
Student Roll Number	311519205001
Maximum Marks	2 Marks

Question-1:

Create a registration page in html with username, email and phone number and by using post method display it in next html page.

register.html

```
<html>

  <head>

    <title>Registration page</title>

    <link rel="stylesheet" href="{{url_for('static', filename='register.css')}}">

  </head>

  <body>

    <div class="center"> <br /><br />

    <form action="/register" method="POST">

      <h1>Register</h1> <br /><br />

      <p> Enter username:</p>

      <input type="text" name= "username" />

      <p> Enter email:</p>

      <input type="email" name="email"/>

      <p> Enter Phone number:</p>

      <input type="text" name="phone"/>

      <br><br><br>

      <input type="submit" value="submit" />

    </form>

  </div>

</body>

</html>
```

register.css

```
.center{  
margin: auto;  
width: 10%;  
}  
  
h1{  
text-align:center;  
}  
  
input{  
border-radius:5px;  
padding:7px;  
}
```

home.html

```
<html>  
  
<head>  
    <title>Home</title>  
</head>  
  
<body style="text-align:center">  
    <h2>Welcome {{username}} </h2><br/><br/>  
    <b>Username</b> - {{username}}<br/><br/>  
    <b>Email Address</b> - {{email}}<br/><br/>  
    <b>Phone number</b> - {{phone}}<br/><br/>  
</body>  
</html>
```

Register.py

```
from flask import Flask,render_template,request  
  
app=Flask(__name__)  
  
@app.route("/")  
def home():  
    return render_template("register.html")  
  
@app.route("/register",methods=["POST","GET"])
```

```
def register():  
    if request.method=="POST":  
        username=request.form.get('username')  
        email=request.form.get('email')  
        phone=request.form.get('phone')  
        return render_template("home.html",username=username,email=email,phone=phone)  
  
if __name__ == '__main__':  
    app.run(debug=True)
```

Output:

The image shows two screenshots of a web browser. The top screenshot shows a registration form titled "Register" with fields for username, email, and phone number, and a submit button. The bottom screenshot shows the output of the form, displaying the user's details.

Question-2:

Develop a flask program which should contain at least 5 packages used from pypi.org.

Packages used:

1. render_template
2. url_for
3. redirect
4. request
5. abort

Program :**python_packages.py**

```
from flask import Flask,render_template,request,redirect,url_for,abort
```

```
app=Flask(__name__)
```

```
@app.route("/")
```

```
def home():
```

```
    return render_template("register.html")
```

```
@app.route("/register",methods=["POST","GET"])
```

```
def register():
```

```
    if request.method=="POST":
```

```
        username=request.form.get('username')
```

```
        email=request.form.get('email')
```

```
        phone=request.form.get('phone')
```

```
        if username=="admin":
```

```
            return redirect(url_for("admin_page"))
```

```
        return render_template("home.html",username=username,email=email,phone=phone)
```

```
@app.route("/admin")
```

```
def admin_page():
```

```
    return render_template("admin.html")
```

```

@app.route("/validate",methods=["POST","GET"])
def validate_admin():
    if request.method=="POST":
        password=request.form.get('password')
        if(password=="abcd"):
            return render_template("admindashboard.html")
        else:
            abort(403)

if __name__ == '__main__':
    app.run(debug=True)

```

register.html

```

<html>
<head>
    <title>Registration page</title>
    <link rel="stylesheet" href="{{url_for('static', filename='register.css')}}">
</head>
<body>

Welcome Administrator

Who is an administrator?

Web administrators design, develop, maintain and troubleshoot websites. Most importantly, they ensure a safe and efficient user experience. This may include implementing security protocols, modifying programs, creating backups, resolving software problems, updating content and more. They may work with many clients or for one organization to design, program and monitor websites. Specific responsibilities include:

- Coding websites – the most popular languages include HTML and JavaScript
- Collaborating with development teams to program websites
- Setting up tools to monitor website traffic
- Analyzing website traffic to inform design decisions
